

RoHS Certificate of Compliance

The RoHS Directive is a directive defined by the Directive 2011/65/EU of the European Parliament and of the Council of June 8, 2011, aimed at restricting the use of certain hazardous substances in electrical and electronic equipment. All the concerned Member States have to provide domestic legislation for the certain hazardous substances in electrical and electronic equipment, and to establish a system minimizing any risks that will harm environment and human health, including all phases from production to disposal. However, the RoHS Directive includes exemptions that define permitted uses for such regulated substances. Please refer to the RoHS Directive and gain proper information on the exemptions. The RoHS Directive is subject to continuous revisions; therefore, please also confirm the latest information.

Covered Products

The SanKen's semiconductor devices, except for NRND (not recommended for new designs) and discontinued products.

The products listed below may not be covered by this certificate. For more details, please contact our local sales representatives.

- The products ordered on or before September 30, 2011
- The products listed in the "Not Recommended for New Designs (NRND) / Discontinued Products" on our website
- Some customized products
- The products not purchased from authorized sales channels
(Counterfeit products shall not be covered by our warranty.)

RoHS Exemptions

The RoHS exemptions define specific applications permitting the fixed-term use of the restricted substances that are not substitutable due to technological and scientific reasons. Table 1 provides the exemptions applicable to our products.

Table 1. RoHS Exemptions for SanKen Products (RoHS2 Directive 2011/65/EU, Annex III)

No.	Exemption
7(a)	Lead in high melting-point solders (i.e., lead-based alloys with a lead content of ≥ 85 wt%).
7(c)-I	Electrical and electronic components which contain lead in a glass or ceramic other than dielectric ceramic in capacitors (e.g., piezoelectric devices), or in a glass or ceramic matrix compound.
15(a)	Lead in solders to complete a viable electrical connection between the semiconductor die and carrier within integrated circuit flip chip packages.

Analysis Result

We guarantee that our covered products (except for the RoHS exemptions) meet the criteria for the substance groups listed in Table 2, whose content concentration levels do not exceed the regulated limits.

Table 2. 10 Substances Restricted by the RoHS Directive

No.	Group of Substances	Regulated Limit
1	Lead and its compounds	≤ 1000 ppm (0.1 wt%)
2	Mercury and its compounds	≤ 1000 ppm (0.1 wt%)
3	Cadmium and its compounds	≤ 100 ppm (0.01 wt%)
4	Hexavalent chromium and its compounds	≤ 1000 ppm (0.1 wt%)
5	Polybrominated biphenyls (PBB)	≤ 1000 ppm (0.1 wt%)
6	Polybrominated diphenyl ethers (PBDE)	≤ 1000 ppm (0.1 wt%)
7	Di-2-ethylhexyl phthalate (DEHP)	≤ 1000 ppm (0.1 wt%)
8	Butyl benzyl phthalate (BBP)	≤ 1000 ppm (0.1 wt%)
9	Di-n-butyl phthalate (DBP)	≤ 1000 ppm (0.1 wt%)
10	Diisobutyl phthalate (DIBP)	≤ 1000 ppm (0.1 wt%)

Important Notes

- All data, illustrations, graphs, tables and any other information included in this document (the “Information”) as to Sanken’s products listed herein (the “Sanken Products”) are current as of the date this document is issued. The Information is subject to any change without notice due to improvement of the Sanken Products, etc. Please make sure to confirm with a Sanken sales representative that the contents set forth in this document reflect the latest revisions before use.
- The Sanken Products are intended for use as components of general purpose electronic equipment or apparatus (such as home appliances, office equipment, telecommunication equipment, measuring equipment, etc.). Prior to use of the Sanken Products, please put your signature, or affix your name and seal, on the specification documents of the Sanken Products and return them to Sanken. When considering use of the Sanken Products for any applications that require higher reliability (such as transportation equipment and its control systems, traffic signal control systems or equipment, disaster/crime alarm systems, various safety devices, etc.), you must contact a Sanken sales representative to discuss the suitability of such use and put your signature, or affix your name and seal, on the specification documents of the Sanken Products and return them to Sanken, prior to the use of the Sanken Products. The Sanken Products are not intended for use in any applications that require extremely high reliability such as: aerospace equipment; nuclear power control systems; and medical equipment or systems, whose failure or malfunction may result in death or serious injury to people, i.e., medical devices in Class III or a higher class as defined by relevant laws of Japan (collectively, the “Specific Applications”). Sanken assumes no liability or responsibility whatsoever for any and all damages and losses that may be suffered by you, users or any third party, resulting from the use of the Sanken Products in the Specific Applications or in manner not in compliance with the instructions set forth herein.
- In the event of using the Sanken Products by either (i) combining other products or materials or both therewith or (ii) physically, chemically or otherwise processing or treating or both the same, you must duly consider all possible risks that may result from all such uses in advance and proceed therewith at your own responsibility.
- Although Sanken is making efforts to enhance the quality and reliability of its products, it is impossible to completely avoid the occurrence of any failure or defect or both in semiconductor products at a certain rate. You must take, at your own responsibility, preventative measures including using a sufficient safety design and confirming safety of any equipment or systems in/for which the Sanken Products are used, upon due consideration of a failure occurrence rate and derating, etc., in order not to cause any human injury or death, fire accident or social harm which may result from any failure or malfunction of the Sanken Products. Please refer to the relevant specification documents and Sanken’s official website in relation to derating.
- No anti-radioactive ray design has been adopted for the Sanken Products.
- The circuit constant, operation examples, circuit examples, pattern layout examples, design examples, recommended examples, all information and evaluation results based thereon, etc., described in this document are presented for the sole purpose of reference of use of the Sanken Products.
- Sanken assumes no responsibility whatsoever for any and all damages and losses that may be suffered by you, users or any third party, or any possible infringement of any and all property rights including intellectual property rights and any other rights of you, users or any third party, resulting from the Information.
- No information in this document can be transcribed or copied or both without Sanken’s prior written consent.
- Regarding the Information, no license, express, implied or otherwise, is granted hereby under any intellectual property rights and any other rights of Sanken.
- Unless otherwise agreed in writing between Sanken and you, Sanken makes no warranty of any kind, whether express or implied, including, without limitation, any warranty (i) as to the quality or performance of the Sanken Products (such as implied warranty of merchantability, and implied warranty of fitness for a particular purpose or special environment), (ii) that any Sanken Product is delivered free of claims of third parties by way of infringement or the like, (iii) that may arise from course of performance, course of dealing or usage of trade, and (iv) as to the Information (including its accuracy, usefulness, and reliability).
- In the event of using the Sanken Products, you must use the same after carefully examining all applicable environmental laws and regulations that regulate the inclusion or use or both of any particular controlled substances, including, but not limited to, the EU RoHS Directive, so as to be in strict compliance with such applicable laws and regulations.
- You must not use the Sanken Products or the Information for the purpose of any military applications or use, including but not limited to the development of weapons of mass destruction. In the event of exporting the Sanken Products or the Information, or providing them for non-residents, you must comply with all applicable export control laws and regulations in each country including the U.S. Export Administration Regulations (EAR) and the Foreign Exchange and Foreign Trade Act of Japan, and follow the procedures required by such applicable laws and regulations.
- Sanken assumes no responsibility for any troubles, which may occur during the transportation of the Sanken Products including the falling thereof, out of Sanken’s distribution network.
- Although Sanken has prepared this document with its due care to pursue the accuracy thereof, Sanken does not warrant that it is error free and Sanken assumes no liability whatsoever for any and all damages and losses which may be suffered by you resulting from any possible errors or omissions in connection with the Information.
- Please refer to our official website in relation to general instructions and directions for using the Sanken Products, and refer to the relevant specification documents in relation to particular precautions when using the Sanken Products.
- All rights and title in and to any specific trademark or tradename belong to Sanken and such original right holder(s).
